

Dear Quell Customer,

RoHS and REACH Compliance Declaration

RoHS Compliance

Quell Corporation has been producing EESeals that are RoHS compliant for many years. The majority of Quell Corporation products are RoHS compliant. RoHS COMPLIANT means that the substances restricted by the EU Directive 2011/65/EU and subsequent amendments of the European Parliament are not contained in a finished product above threshold limits unless the restrictive substance is subject of an exemption contained in the RoHS Directive. Quell Corporation cannot guarantee that inventory held by distributors or other third parties is RoHS compliant.

Certain customers require parts that are not RoHS compliant. Quell Corporation produces these parts but their manufacturing, storage and handling is completely segregated from the RoHS compliant parts to minimize contamination of the RoHS compliant products.

REACH Compliance

We do not manufacture or supply “substances” or “preparations” and our articles do not involve the “intentional release of substances”. Accordingly, we foresee no registration or pre-registration requirement for the EESeals we supply.

Quell Corporation products (EESeal EMI Filterseal) do not contain Substances of Very High Concern (SVHC) above the threshold value declared as per ECHA updated as of November 2, 2017 with 174 SVHC.

As regulations change from time to time, we will keep you abreast of any updates via our website. The RoHS and REACH statement are posted on www.eeseal.com/downloads. For additional information, please contact Daniel Baca at: Daniel@quell.us.

Thank you for your continued support.

Sincerely,

A handwritten signature in black ink that reads "Daniel Baca". The signature is written in a cursive style with a large, looped initial "D".
